Lead Evaluator

Minimum Viable Product (MVP)

Presented by : **Tasnim Talha**

linkedin.com/in/tasnimtalha09/

Problem Statement

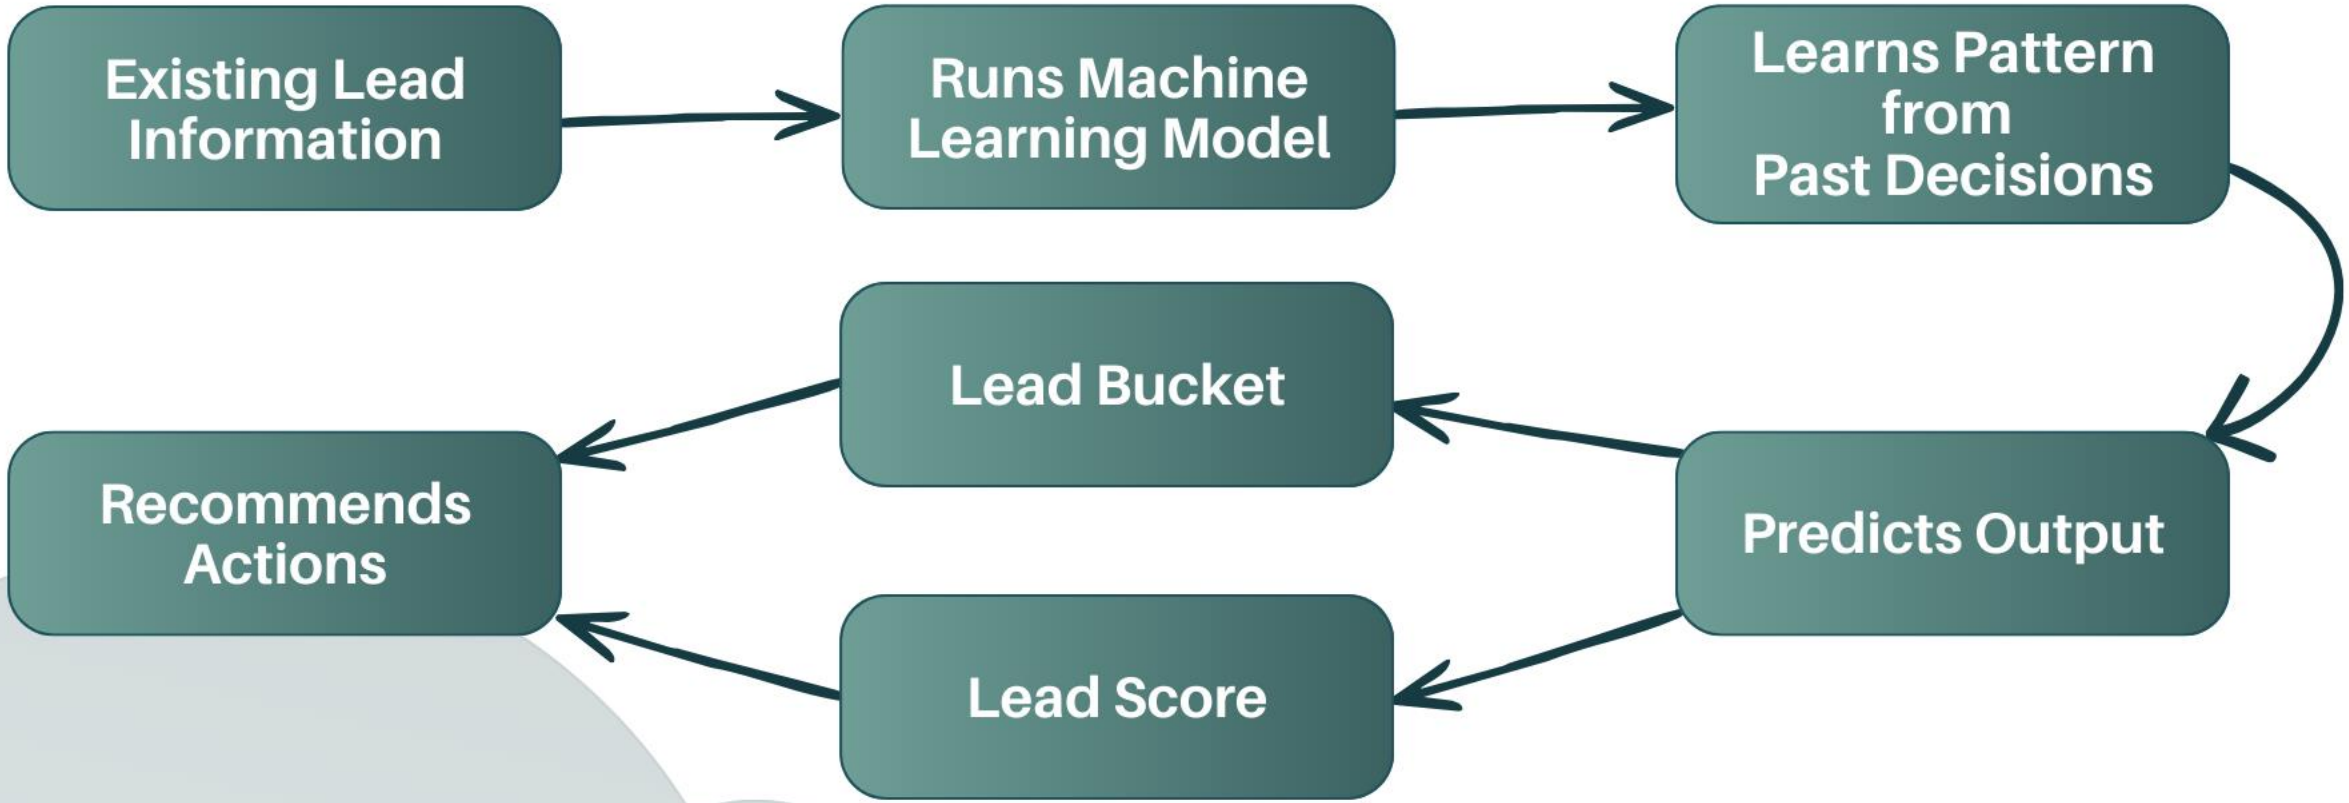

Common Practice

- Manual lead verification
- Time heavy duty
- No standardization
- Decision varies
- Risk of inconsistency

Solution

- **Automatic** verification
- Takes seconds
- **SOP** established
- **Learns** gradually
- **Consistent** results

The Big Idea

Existing Lead Information
Runs Machine Learning Model
Learns Pattern from Past Decisions
Lead Bucket
Recommends Actions
Predicts Output
Lead Score

Dataset Overview

Synthetic Data

3,000 Dummy Companies

5 Lead Buckets

3 Districts

8 Industries

10 Locations

4 Company Sizes

3 Digital Signals

Required Amount

Urgency Days

25 Columns

Payment Methods

Machine Learning Model

CatBoost Classifier

Model Overview

CatBoost Classifier

- **Categorical Boosting**
- Like having a super-smart assistant who specializes in handling **categorical** data
- This assistant isn't just smart; it's fast and accurate too, making it a popular choice among data scientists.

Model Performance

78.15%
Macro F1

4.22%
Overfitting

79.00%
Accuracy

82.13%
Hot & Warm Recall

99.16%
Qual-vs-Not AUC

95.10%
Weighted ROC AUC

99.62%
Macro ROC AUC

Practical Demonstration

Why Should *You* Use a ML-based Lead Evaluator?

What's in it for *YOU*?

Faster First-Level Screening

- Instantly scores and categorizes leads
- Reduces manual workload on repetitive steps
- Allows sales teams to focus on high-value conversations

Consistency & Objectivity

- Same evaluation logic to every lead
- Eliminates bias, mood-based judgment & inconsistency
- Standardized prioritization

Data-Driven Support for Human Decisions

- Helps validate or challenge gut feeling
- Sales managers retain final authority

Scalable & Repeatable

- Works the same way whether you score 10 leads or 10,000
- Ideal for growing inbound leads
- Enables structured tracking & performance analysis

What's in it for *YOU*?

*This tool **augments** your sales intelligence, not replace human judgment. It makes good teams **faster & better**.*

Next Stages

Real-World Pilot Testing
